EXPERIENCE

LTIMindtree

Aug 2021 – May

2023

Software Engineer

Chennai, IN

- Developed and maintained 8 full-stack web applications in a modern **Agile SDLC** utilizing REST API, across dev, QA, and production environments, delivering 50+ new features that enhanced user engagement and operational efficiency.
- Headed the **requirement analysis** to devise technical solutions, resulting in a **25% reduction in post-release defects**.
- Automated email reminders**, enhancing communication, accelerating submissions, and minimizing delays in workflows.
- Conducted **ad hoc analysis** on over 1M user records using **SQL and Excel**, extracting insights on user preferences, which informed strategic decisions and contributed to a **7% increase in profit**.
- Designed comprehensive **Tableau dashboards** that provided actionable insights for **cost-benefit analysis** and **web analytics**, leading to the identification of **key performance indicators (KPIs)** essential for enhancing user engagement by 5-8%.
- Streamlined FacHybrid codebase with **Git** for efficient **version control**, reducing code conflicts and enhancing code quality.
- Implemented **CI/CD pipelines** with Hudson, optimized server monitoring with **Putty and Splunk**, reducing downtime.

PROJECTS

Smart City Data Streaming Pipeline ([Project Code](#))

- Built real-time data pipeline with **Kafka, Spark, Docker**, and **Amazon Redshift**, processing 1M+ **IoT-generated data**.
- Automated** data workflows using **AWS S3, Glue, Athena**, and **Power BI**, enabling actionable insights for operational visibility.
- Maximized pipeline efficiency by 50%, with 99.9% uptime and processing large-scale records for actionable Smart City insights.

Bank Market Prediction Analysis ([Project Code](#))

- Built scalable **ETL** pipelines with **Apache Airflow**, cutting data preprocessing time by 20% for accurate subscription prediction.
- Orchestrated data transformation and feature engineering on 450K+ financial records, increasing model accuracy by 12%.
- Leveraged **Google Cloud Platform (GCP)** for data storage, **pipeline deployment, and integration** with CI/CD workflows.
- Integrated **MLflow** for experiment tracking, enhancing reproducibility and reduced debugging time by 17% across workflows.
- Developed **RESTful APIs** with **Flask**, for seamless integration with data pipelines and enabling real-time client risk assessment.

Sales and Customer Dashboard ([Dashboard Link](#))

- Crafted **Tableau dashboards** to analyze KPI, including **sales** and **profit metrics**, facilitating data-driven decision-making.
- Designed dashboards with **advanced filters**, uncovering customer behavior, sales trends, and reducing stock-outs by 21%.

IPL Auction Analysis ([SQL Script](#))

- Created a **relational database** in SQL with 10+ tables, leveraging **normalization** and **ER diagrams** to optimize performance.
- Employed advanced SQL techniques such as **joins, subqueries, aggregations, and window functions** to extract actionable insights from IPL auction data; informed strategic decisions that boosted player selection efficiency by 15%.
- Analyzed player demand, top performers, and franchise budget allocations using SQL to guide auction strategy development.

Customer Segmentation ([Project Code](#))

- Constructed a customer segmentation model leveraging **RFM (Recency, Frequency, Monetary)** and **K-means clustering** to segment buyer behavior, pinpoint high-value customers, and flag those likely to churn, improving targeted marketing strategies.
- Improved the data integrity by 95%** through comprehensive data cleaning, transformation, and outlier detection using **Python**.

TECHNICAL SKILLS

Programming Languages: Python (NumPy, Pandas, Seaborn, Matplotlib, Scikit-learn, Tensorflow, PyTorch), SQL, NoSQL, Oracle

ETL & Analytical Tools: Tableau, Power BI, Looker, Airflow, Kafka, MS Excel (VLOOKUP, Pivot Tables, VBA), Spark

Data Warehouse Tools: MySQL, AWS (S3, Glue, Athena, Redshift), GCP, BigQuery, Docker, Snowflake

Others: Git, GitHub Actions, Jira, BitBucket, Hudson, FLASK, Windows, iOS, Linux

EDUCATION

Northeastern University, Boston

Expected 2025

MS Data Analytics Engineering

CGPA 3.94

Coursework: Data Mining, Data Visualization, Machine Learning Operations, Natural Language Processing

Anna University, Tamil Nadu, India

May 2021

BE Computer Science and Engineering

CGPA 3.64

Coursework: Design & Analysis of Algorithms, Database Management, Software Engineering, OOPS, Probability and Statistics
